REPORT OF THE COMMITTEE OF VISITORS,

Presented at the Hilary Sessions for 1862.

The Committee of Visitors of the Wilts County Asylum report as follows :

	MALE. FEMALE. TOTAL.		
The number of patients in the Asylum on the 1st of January, 1861, was :	141	209	350
	M. F. T.		
Admitted for the first time during the year	44	52	96
Re-admitted during the year	9	17	26
	<hr/>		
	53	69	122
Total under care during the year.....	194	278	472
Discharged or Removed :			
	M. F. T.		
Recovered	12	32	44
Relieved.....	5	5	10
Not improved	2	2	4
Died	22	26	48
	<hr/>		
	41	65	106
Remaining in the Asylum on the 31st December, 1861	153	213	366

The receipts and payments during the year are exhibited under the following different heads:—

MAINTENANCE ACCOUNT.

At the Hilary Sessions last year your Committee thought it desirable to recommend an increase of the weekly rate of payment for patients from 7s. to 7s. 3½d., which was made accordingly; but, owing to the high cost of provisions, your Committee soon found that this augmentation was insufficient to enable them to meet the expenditure, which exceeded the receipts by a very considerable sum. They found it necessary, therefore, at their quarterly meeting in July, to increase the weekly charge from 7s. 3½d. to 7s. 7d. This higher rate has been in operation for one quarter only; and it is hoped, unless high prices should continue to prevail, that it will be sufficient to meet the future charge.

PRINCIPAL AND INTEREST ACCOUNT.

There has been received, during the year, from rates £3553 3s. 8d. The payments have been as follows:—

	£	s.	d.
Principal paid off.....	2000	0	0
Interest on ditto	1507	9	0
Income Tax.....	35	12	6
	<hr/>		
	£3543	1	6

The balance on this account in the Treasurer's hands is £729 7s. 5d., applicable for the payment of interest up to the April Sessions (before which period there will be no receipts), amounting to £615 10s. 3d.

The debt remaining unpaid is now £33,500.

FIRST COST ACCOUNT.

The receipts during the year have amounted to £238 11s. The payments on account of Engineers' house, the erection of which was ordered at the last Hilary Sessions, have been £243 9s. 3d.—leaving on this account, a balance due to the Treasurer of £253 2s. 8d.

SPECIAL RATE AND REPAIRS ACCOUNT.

The payments for repairs have been £40 19s. 10d., and for improvements £193 10s. 7d., leaving a balance in the Treasurer's hands amounting to £689 2s. 3d., which will render it unnecessary to make any rate on this account during the year.

Your Committee regret that they have now to acquaint you that the number of patients, especially female patients, is steadily increasing. Many of the female wards are crowded by the admission of extra beds; and the asylum contains within its walls, at this time, many patients in excess of the number for which it originally provided. Your Committee have therefore been compelled to take into consideration the necessity of again increasing the accommodation for patients; and this necessity has still further been pressed upon them by the Commissioners in Lunacy.

Your Committee have been in communication with the County Surveyor on the subject, with a view to ascertain the best practicable mode of effecting this object; but they are not prepared to lay before the Court any specific plan for adoption, nor indeed would it be possible to commit the County to any plan at present, as it must be subject to the

approval of the Secretary of State. They however feel it necessary to be prepared to make some increase of the building, and therefore they request authority to make such enlargement as may be absolutely necessary for duly carrying on the purpose of the Institution.

THE CHAPLAIN'S REPORT.

The accustomed service of morning prayer, with the addition of afternoon prayers and a sermon on Sundays, Christmas day, and Good Friday, has been duly performed, with an average attendance of two-thirds of the patients.

The Committee conclude their Report by the expression of their satisfaction at the management of the Asylum under the direction of the Medical Superintendent; and they are happy to see this favourable opinion confirmed by the testimony of the Commissioners in Lunacy, a copy of whose Report is appended.

The statistics of this management will be found in Dr. Thurnam's Report; and a detailed account given, with great minuteness, of the receipts and expenditure of the establishment. This Report will be in the hands of Magistrates and ready for general circulation before the April Sessions.

For the Committee,

G. P. LOWTHER,
Chairman.

At the close of another year, the Medical Superintendent presents to the Committee of Visitors his
Eleventh Annual Report.

Eleventh
Annual
Report.

During the year, 122 patients have been admitted ; a number somewhat larger than in any former year since the Asylum was opened. Of these, 26 were re-admissions. The Medical Superintendent regrets to observe on the unfavorable character of the cases admitted ; among which a large proportion, either from their age, or the nature of their maladies, mental or bodily, offer little prospect of restoration to health. Several, indeed, were sinking when admitted, from the effects of disease. One admission deserves particular notice. It was that of a male patient who, in consequence of mania recurring at uncertain intervals, had on four occasions been an inmate of the Asylum. In the spring of the present year, on the first day of a fresh attack, he presented himself at the Asylum gates in an incoherent state of mind, being perfectly unable to express his wants. He was of course taken care of, and the Relieving Officer of his parish communicated

Numbers
and
Admissions.

with; and on the next day he was admitted under the proper order and medical certificate. At the end of about a month he was discharged recovered.

Average
Numbers.

At the beginning of the year, there were in the Asylum 350 patients, of whom 141 were men and 209 women: the present number is 366; viz., 153 males and 213 females. Two of this number (one man and one woman) are "absent on trial;" and one man who escaped on the 27th Dec., has not yet been recaptured. The average numbers resident during the year have been 141.5 men, and 209.7 women; total 351.2.

Crowded
state of
Asylum.

From a comparison of the above numbers, it appears that the "gradual increase" reported last year has not diminished; but, on the contrary, has continued to progress. The number of men is greater by 12, that of women by 4, than at the commencement of the year.

The Asylum is all but full on the male side, whilst in the female department the dormitories are, and have been for more than twelve months, unavoidably over-crowded. During the past Autumn, there were often 214, and even 215, women in the house; a number which could not be permanently accommodated in the existing building without inconvenience and risk as to the sanitary condition of the Asylum. This will be obvious, when it is remembered that the original accommodation provided consisted of only 143 beds for each sex (First Report, p. 27); and that, in 1858, an additional ward was added to the female wing, affording

35 more beds (8th Report, p. 14), giving a total of 178. There have thus, for some time past, been from 30 to 35 more patients in the female department than contemplated in the architectural arrangements. This excess has been provided for in three different ways: 1. By the use of the Infirmary department for dormitories. 2. By the use, for the same purpose, of a large room on the second floor of the centre building, adjoining the sleeping rooms of the house-servants. And 3. By crowding the larger dormitories; in nearly all of which, at the present time, more patients sleep than desirable. On the male side, there are now 10 more patients than the 143 for whom provision was originally made; all the wards are full; and there are only two small rooms in the Infirmary, in which four or five more beds can, in case of necessity, be placed.

Under these circumstances, the Committee of Visitors have, after due inquiry, resolved that it is necessary to increase the accommodation in the Asylum; and are taking the necessary steps to carry this resolution into effect.

In the necessity for enlargement, this Asylum does but follow in the track of other similar establishments throughout the kingdom; in nearly all of which a considerable increase of accommodation has been found requisite, within a very few years of their opening. It is a remarkable circumstance that, notwithstanding the stationary or slightly retrograde population of the county*, the number of pauper insane

Causes of
Necessity
for Enlarge-
ment.

* 249,455 in 1861, as compared with 254,221 in 1851.

has very materially increased. In 1847, when the first steps were taken for the erection of the Asylum, there were, according to the Commissioners' Report for that year, no more than 364 "Insane Persons, Lunatics, and Idiots," chargeable to the different Unions; and on the 1st January, 1852, the year after the Asylum was opened, the number was still only 407; of whom 322 were in Asylums, 84 in Workhouses, and 91 with their Friends or elsewhere.

	IN COUNTY ASYLUM.	IN OTHER ASYLUMS.	IN WORK- HOUSES.	WITH FRIENDS &C.	TOTAL.
Jan. 1, 1847	—	181	92	91	364
1852	165	67	84	91	407
1857	314	4	100	142	560
1861	350	5	121	171	647*

During the nine years which have since elapsed, the increase in these numbers has been enormous; so that the Returns for the 1st January, 1861, show no less than 647 of such persons*; of whom 355 were in Asylums, 121 in Workhouses, and 171 with their Friends or elsewhere. In the ten years, the reported numbers had increased by nearly two-thirds, or at the rate of about 60 per cent. It is important to remark that the revised Act for the regulation of Public Lunatic Asylums and for the care of Pauper Lunatics (16 & 17 Vict., c. 97) came into operation during the first half

* This number, however, includes 46 patients chargeable to the Boroughs of Salisbury and Devizes not enumerated in the two earlier Returns. Out of the 560, in 1857, there were 36 chargeable to these two Boroughs. For the Returns above referred to, see Annual Reports of the Wilts County Asylum, Tables 16, &c;—Commissioners' Further Report, 1847, p. 384—386;—Commissioners' Fifteenth Report, 1861, p. 238. See also a concise sketch of views of the Commissioners on the above subject, in the *Lancet* for October 19, 1861, p. 364.

of this period, viz., in 1853. The increase in the reported numbers of the pauper insane in the entire kingdom, during the same period, has been even greater than in Wiltshire; and between the years 1847 and 1860, has been at the rate of 74 per cent. In 1849, the number actually under care in asylums was 10,800; in 1859, it amounted to 18,022. This great increase in the number of insane persons chargeable to the rate-payers, is a subject of national importance, and, as such, has engaged the attention of the Commissioners in Lunacy, in their last, viz., Fifteenth Report. They show that it cannot be attributed to any increase of pauperism in the country, there being a considerable decrease in the number of those in receipt of relief; and they are unable to discover any material changes in the social condition of the labouring population, rendering them more prone to mental disease. They show that the amount of known insanity in the classes above pauperism, has rather diminished than increased, for some years past. They hence conclude that the *apparent* increase of insanity in this country, as indicated by the growing demand for asylum accommodation, is mainly due to recent legislation, which ensures the more complete enumeration and public treatment of pauper lunatics. From a review of all the facts before them, the Commissioners conclude that the increase is attributable to three principal causes:—

1. To the detection and registration of cases formerly left unnoticed or unreported.

2. To the removal to asylums of an increased proportion of patients from the influence of conditions unfavourable to life.

And, 3. To the effect of sanitary regulations in asylums, of improved diet, and of various means of sustaining the health and promoting the longevity of the entire body of inmates.

Of the general accuracy of these views there can scarcely be a doubt; nor yet as to the conclusion of the Commissioners, "that such causes being still in operation, we can only calculate on a further progressive increase; and we accordingly draw attention to the subject, in the hope that Committees of Visitors will see the necessity of a timely increase of accommodation."

Discharges
and
Recoveries.

The *recoveries* during the year have been forty-four in number; a proportion quite as large as was to have been expected, considering the unfavourable character of the cases admitted during the last two years. Of the whole number, as many as ten were discharged on trial, for periods of two months each. Only one of each sex was brought back to the Asylum, before the expiration of the period of trial. Ten patients have been removed or discharged as *relieved*; and four others, *not improved*, have been removed to other asylums, under the proper orders.

"Criminal
Lunatics."

There are under care, at the present time, seven "Criminal Lunatics;" viz., 6 males and 1 female. One man was admitted early in the year, under order of the Secretary of State; he having been found insane on arraignment, on a charge of "wounding horses." He died of pulmonary consumption, after a residence of about nine months. A female patient, under a like order, was transferred from the Colney

Hatch Asylum ; she having been found insane, whilst suffering imprisonment, in the House of Detention at Clerkenwell, for want of sureties to keep the peace. In less than half a year she was discharged recovered. Another female criminal patient was admitted in May last, from the gaol at Salisbury, she being found insane whilst undergoing imprisonment, after conviction of larceny. She still remains in the Asylum. The man admitted from prison in 1860, has died during the present year, of apoplexy ; after a residence of about sixteen months.

The health of the patients has generally been good, and no particular epidemic has prevailed.

General
Health.

In consequence of the extremely unfavourable condition as to health of so many of those admitted, the deaths have exceeded the average, and been forty-eight in number. Nineteen, or nearly two-fifths of the whole, were persons above sixty years of age ; thirteen ranging from seventy-two to ninety-one years. The mortality for the year has amounted to 13.6 per cent. ; being two per cent. more than the mean rate since the opening of the Asylum.

Deaths and
rate of
Mortality.

MEAN ANNUAL MORTALITY.	MALES.	FEMALES.	BOTH SEXES.
For the year 1861. . .	15.5	12.4	13.66
For 10.35 years—1851-1861	15.6	8.9	11.8

The deaths from diseases of the brain, as apoplexy, general and partial paralysis, epilepsy, and tumour or other cerebral disease, exceed the usual proportion, being twenty-one, or nearly one half of the

Causes of
Death.

whole. There have been six deaths from pulmonary consumption ; and five from inflammation or other disease of the lungs and heart. In nine cases, all of aged persons, death was only attributable to gradual exhaustion. In two men, death resulted from fracture ; and in both cases an inquest was, of course, held.

Inquests. One was that of an imbecile and quarrelsome person, who was pushed down by an excited patient, whom he had provoked ; and thus sustained a fracture of the coracoid process of the scapula. He died in consequence, on the ninth day from the receipt of the injury. The verdict was "Accidental Death"; no blame appearing to attach to the attendants. The other was a severe case of compound comminuted fracture of the head and neck of the thigh-bone, sustained before admission into the Asylum ; the patient having thrown himself from a window during a paroxysm of suicidal melancholia, apparently induced by the consequences of a "strike" among the masons engaged on the Hungerford and Devizes Railway, of whom he was one. He died from the effects of the injury, in about ten weeks after admission. The verdict of the Coroner was "Suicide under temporary derangement."

Birth of Child. A child was born in the Asylum on the 29th of October ; the mother having been admitted on the 13th of April, whilst labouring under a recent attack of mania. Since her confinement she has experienced a paralytic seizure, which has retarded her recovery.

Escapes. Six escapes have again to be reported. Three of these were by the same patient ; who is in general usefully employed on the farm, but at times is the subject

of a sudden impulse to escape, and being very light of foot, is with difficulty overtaken. On the first and second occasions, he was brought back the same day; the third time he reached his home, but was returned by the police on the morning of the second day. After his first escape, the attendant in charge was fined a week's wages; he having failed to report the escape for more than an hour after being aware of it; this being the first case in which it has been thought necessary to enforce such fine. In two other instances, the patients were so far convalescent, that having succeeded in getting to their families, they were allowed to remain on trial for two months,—a probation which terminated satisfactorily in one case, that of a female; but not so in that of an old man, who was brought back to the Asylum at the end of a month, he being found unmanageable at home. None of the patients suffered any harm whilst absent; but in the sixth instance the fears of others were somewhat excited.

There have been three or four casualties; but, excepting that already described, none of a very severe or fatal character. One epileptic patient fractured the collar bone, during a paroxysm of her malady. Another querulous female received a sudden blow on the arm from a fellow patient whom she had provoked, by which the bone was broken. Under similar circumstances, a male patient received a blow on the cheek, by which the lower-jaw was fractured. In both cases the attendants were close at hand, but there was no time to interfere and prevent the mischief. Neither of those who gave the blows, were patients who, under any system of management, would have been considered

Casualties.

fit subjects for permanent seclusion or restraint by mechanical means. Of course such accidents are very much to be regretted, but it is vain to suppose that they can be entirely prevented.

Cottage for
Engineer. The detached cottage for the engineer, referred to in the last Report, was completed in the autumn. It is conveniently situated to the north of the Asylum, mid-way between the gas-works and engine-house. It has recently been entered upon by the engineer, who much appreciates the advantages thus secured to himself and family. No other addition to, or material improvement in, the Asylum buildings has been carried out during the year.

Repairs of
Furniture—
Mattrasses. The furniture and fittings of the establishment require constant attention to keep them in repair and order. Many of the horse-hair mattrasses have, from time to time, been re-made; and during the past summer, the entire stock (of more than 350) has been thoroughly cleansed and re-made by the female patients and servants, with the aid of a single upholsteress.

Decoration
and Fur-
nishing
of Wards. Some further expenditure in the internal furnishing and decoration of the wards has lately been sanctioned by the Committee, and is now being carried out.

Employ-
ment,
Recreations,
&c. Nothing very new has to be reported in connection with the employment or recreation of the patients. A large party of the more orderly and tranquil attended the exhibition of a panorama at Devizes; and on one occasion, during the preceding

winter, a performer of sleight-of-hand exhibited before a much larger number in the Asylum hall, to their great amusement. As usual, a large party attended the service at St. Mary's church, on the occasion of the festival of the Wiltshire Friendly Society. One Sunday, in the spring of the year, when the services at the Asylum were unavoidably omitted, in consequence of the whitewashing and painting of the chapel, a party of about ninety, with their attendants, walked to the village of Potterne, about two miles distant, and attended morning service at the church there. These little deviations from the usual routine were highly appreciated, and, like all similar judicious indulgences and marks of confidence, appeared, in some cases, productive of positive benefit, and in no instance of injury.

There have been some changes amongst the attendants and servants from resignation. The tailor attendant, who had been engaged almost from the opening of the Asylum, died from asthma, after a short illness, early in the year. The conduct of the attendants and servants has, with little exception, been satisfactory.

Attendants,
and
Servants.

In consequence of the continued high prices and further rise in the cost of provisions and other necessaries, the Committee, in July last, raised the weekly charge at the rate of one half-penny per day, or from 7s. 3½d. to 7s. 7d. per week; at which it remains. From the Fifteenth Report of the Commissioners in Lunacy, it appears that of thirty-seven County Asylums in England and Wales, there were, in 1860, only three

Weekly
Charge.

in which the weekly charge was less, viz.: 7s. 3½d. (Dorset) and 7s. (Lancaster Moor, and N. and E. Ridings); and two only in which it was at the same rate, viz., 7s. 7d. (Somerset, and Prestwich, Lancashire). The average charge, or that in eighteen, about one half of the whole, was from 8s. to 9s. per week.

(Signed)

JOHN THURNAM, M.D.

REPORT OF THE COMMISSIONERS IN LUNACY.

“WILTS COUNTY LUNATIC ASYLUM,
“25th October, 1861.

“The changes in the patients since the visit of our colleagues, on the 8th June, 1860, have been as follows :—

	MALE.	FEMALE.	TOTAL.
Admitted.....	70	93	163
Discharged and removed	30	49	79
„ of whom recovered	22	42	64
„ removed to other Asylums	1	3	4
Died	35	25	60

“The deaths all arose from ordinary causes, calling for no special observation. In the case of one male patient, upon whose body an inquest was held, the verdict of the Jury was ‘Suicide under temporary derangement.’ As however the act was committed before his admission, by throwing himself from a window, the cause of death was properly entered in the register as ‘Fracture of the thigh-bone and consequent exhaustion.’

“ The patients on the books are 361 in number, viz., 147 males, and 214 females. Of the latter, two were absent on trial at the time of our visit. We saw all the patients resident in the Asylum. Two female patients were in seclusion, on account of maniacal excitement. With few exceptions, the remainder were tranquil and orderly, and their personal condition generally was satisfactory.

“ The instances of seclusion since the last visit have not been frequent, not averaging more than one in a week, and mostly occurring in the Female division.

“ Mechanical restraint has only been employed in one case, that of a male patient, who had fractured his thigh, and was prevented by gloves and wrist-straps from removing the surgical appliances.

“ The sanitary condition of the Asylum is good. We found four patients only, all on the female side, confined to bed by sickness. The numbers registered as under medical treatment are 20 on the male side, and 24 on the female.

“ According to the Ward Returns, 9 male patients and 19 females soiled or wet their beds during the night previous to our visit.

“ From two-thirds to three-fifths of the patients attend Divine Service in the Chapel on Sundays and week-days, the Chapel being nearly filled. About the same number, on an average, are usefully employed. The patients are assembled once a month for

evening entertainments, in a spacious corridor in the female division.

“Parties are taken out occasionally for excursions beyond the grounds of the Asylum.

“The weekly charge for pauper patients is now 7s. 7d.; having been raised since last year from 7s., on account of the increased price of provisions.

“The dinner on the day of our visit consisted of Irish stew, and was of excellent quality.

“We have satisfaction in reporting that the condition and management of the Asylum and its inmates continue to be most creditable to the Medical Superintendent and those acting under him.

“The comfort of the patients and the general aspect of the galleries and day-rooms would, we think, be materially promoted and improved by the introduction of more furniture of an ordinary domestic character, and objects of interest of various kinds, calculated to divert the attention.

“The Asylum on the female side is quite full; indeed most of the associated dormitories contain one or two beds in excess of the proper number. On the male side, there are not more than ten or twelve vacant beds. In these circumstances, the necessity arises for an early consideration by the Visitors of the question of providing additional and adequate accommodation for the increasing numbers of pauper lunatics of the County.

“ In reference to the last entry of our colleagues, we learn that since their visit an addition has been made to the staff of attendants by one on the male side and two on the female. We have further to report that some pictures and other objects of interest which, at Dr. Thurnam's suggestion, had then been ordered, have since been received and distributed.

(Signed) R. W. S. LUTWIDGE, } Commissioners
 ROBERT NAIRNE, } in Lunacy.”
